Lab 5: Formatting

3) FORMATTING

TEXT FORMATTING

- **To change the font size or type**

1. Select the text you want to change.
2. Go to the **Home** tab on the Ribbon.
3. In the **Font** group, click the arrow next to the **Font** box to change the font type (e.g., Arial, Times New Roman), or click the **Font Size** box to change the size (e.g., 12, 14).

- **Using the Font dialog box**

1. Select the text.
2. Click the small arrow icon (Dialog Box Launcher) in the bottom-right corner of the **Font** group on the **Home** tab.
3. In the Font dialog box, you can change the font style, size, color, and effects all at once, then click **OK**.
4.

- **To apply colors to selected text**

1. Select the text you want to color.
2. On the **Home** tab, in the **Font** group, click the arrow next to the **Font Color** icon (the letter **A** with a colored bar under it).
3. Choose the desired color from the palette.

PARAGRAPH FORMATTING

- **To insert a paragraph mark**
    - Press the **Enter** key on your keyboard. This ends the current paragraph and starts a new one.
- **To remove a paragraph mark**

1. Turn on the paragraph markers by clicking the **Show/Hide ($\lceil$)** button on the **Home** tab to see where the marks are.
2. Place your cursor just before the paragraph mark and press the **Delete** key (or place it after and press **Backspace**).

- **To align text in a document**

    1. Select the paragraph or text.
    2. On the **Home** tab, in the **Paragraph** group, click one of the alignment buttons:

        - **Align Left** (Ctrl + L)
        - **Center** (Ctrl + E)
        - **Align Right** (Ctrl + R)
        - **Justify** (Ctrl + J)

- **Using the Indent icons**

    1. Select the paragraph.
    2. On the **Home** tab, in the **Paragraph** group, click:

        - **Increase Indent** to move the paragraph further away from the margin.
        - **Decrease Indent** to move the paragraph closer to the margin.

- **To indent a paragraph**

    1. Select the paragraph.
    2. Right-click and choose **Paragraph**, or click the dialog box launcher in the **Paragraph** group.
    3. Under the **Indents and Spacing** tab, look for **Indentation** and set your desired values for Left, Right, or Special (First line / Hanging).

- **To adjust line spacing in a document**

    1. Select the text or paragraphs.
    2. On the **Home** tab, in the **Paragraph** group, click the **Line and Paragraph Spacing** icon.
    3. Choose a spacing option (e.g., 1.0, 1.15, 2.0 for double spacing).

- **To control spacing above and below paragraphs**

    1. Select the paragraphs.
    2. On the **Home** tab, click the **Line and Paragraph Spacing** icon and select **Add Space Before Paragraph** or **Remove Space After Paragraph**, OR go to the **Paragraph** dialog box and change the **Before** and **After** point values under Spacing.

- **What are Tabs?**

    - **Tabs** are markers on the horizontal ruler used to align text precisely at specific horizontal positions when you press the **Tab** key on the keyboard.

- **To set or change tabs using the Ruler**

    1. Make sure the Ruler is visible (go to **View** tab and check **Ruler**).
    2. Click the tab selector at the far left of the ruler until you see the type of tab you want (Left, Center, Right, Decimal).
    3. Click directly on the bottom edge of the horizontal ruler where you want to place the tab stop.

- **To set, change or clear tabs using the drop down menus**

    1. Go to the **Home** tab and click the dialog box launcher in the **Paragraph** group.
    2. Click the **Tabs** button at the bottom-left of the Paragraph window.
    3. Type the tab stop position, choose alignment, click **Set**, or select an existing tab and click **Clear**.

- **To apply bullets to a list using the Bullets icon**

    1. Select the list items.
    2. On the **Home** tab, in the **Paragraph** group, click the arrow next to the **Bullets** icon.
    3. Choose a bullet style from the menu.

- **To add numbering to a list using the Numbering icon**

    1. Select the list items.
    2. On the **Home** tab, in the **Paragraph** group, click the arrow next to the **Numbering** icon.
    3. Choose a numbering format (e.g., 1, 2, 3 or A, B, C).

- **To add a border using the Border icon**

    1. Select the text or paragraph.
    2. On the **Home** tab, in the **Paragraph** group, click the arrow next to the **Borders** icon.
    3. Choose where you want the border to appear (e.g., Bottom Border, Box Border).

- **To add shading**

    1. Select the paragraph or text.
    2. On the **Home** tab, in the **Paragraph** group, click the arrow next to the **Shading** icon (the paint bucket)
    3. Select a background color to shade the area behind the text.

- **To format white text on a black background**

    1. Select the text or paragraph.
    2. Apply **Shading** (from the Paragraph group) and choose **Black** as the fill color.
    3. Change the **Font Color** to **White** using the Font Color icon.

DOCUMENT FORMATTING

- **Document formatting options**
    - Document formatting involves setting up the overall page layout, such as page margins, orientation, size, headers, footers, and page numbers to make the document look professional.

- **To set margins using the Page Setup command**

    1. Go to the **Layout** tab on the Ribbon.
    2. Click on the **Margins** button in the Page Setup group.
    3. Choose a preset margin (e.g., Normal) or click **Custom Margins** to type your own specific measurements.

- **To create a header or footer**

    1. Go to the **Insert** tab on the Ribbon.
    2. In the **Header & Footer** group, click either **Header** or **Footer**.
    3. Choose a built-in design style or select **Edit Header / Edit Footer** to type your own text, then double-click anywhere outside the header area to close it.

- **To insert page numbering into a header or footer**

    1. Double-click the header or footer area to open it (or go to **Insert** > **Header/Footer**).
    2. Go to the **Header & Footer Design** tab that appears on the Ribbon.
    3. Click **Page Number**, select **Current Position** or **Top/Bottom of Page**, and choose a number style.

- **To number pages within a document**

    1. Go to the **Insert** tab.
    2. Click **Page Number** in the Header & Footer group.
    3. Select **Format Page Numbers...** if you need to change the numbering style (e.g., from 1,2,3 to i,ii,iii) or choose where the numbering should start.
